

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0026] with the follow paragraph in its entirety, wherein marking are included to show changes made.

[0026] Figure 2 is a block diagram of a system illustrating the relationships between a design time environment 212, a debugger 216 operating within that design time environment ~~216~~ 212, a hosting process 214, a runtime environment 220, and the user's application 218, in accordance with an embodiment of the present invention. The design-time environment 212 is responsible for instructing the operating system to create the hosting process 214. The design-time environment 212 is also responsible for instructing the debugger 216 to attach to the hosting process and to commence debugging. Furthermore, the design-time environment 212 issues instructions to the hosting process 214 to load the hosted runtime environment 220 and to begin executing the application 218.
